Dynamic Websites (CMS* based)

*cms is shorthand for “content management system”, it allows the end user to make changes easily themselves using tools they will find familiar.

User-managed website - \$299

(incl. theme design, user editable home page, contact page, about page, and one other custom page)

Blog Website - \$349

(incl. theme design, user editable/writable blog posts, contact page, about page, and one other custom page)

Online Store (30 products) - \$799

(home page, contact us page, about page, 30 product listings, products sales system, payment processing with Paypal)

Online Store (100 products) - \$999

(home page, contact us page, about page, 100 product listings, products sales system, payment processing with Paypal)

Website Conversions

Takes a static HTML website and converts it to a CMS based website to allow the user to make changes themselves from that point forward.

1 to 5 page conversion - \$249

(converts entire site into content management system. Allows for users to make changes themselves. Look and content will remain the same)

Support

Support is handled via email. Emailed support issues can usually expect a response within 3 hours depending on timezone.
